

Straights

Another growing sector of ECV business is sales of straights, growing from 14,000 tonnes in 2002 to 36,000 tonnes this year. The mill gives ECV significant buying power allowing us to secure competitive contracts.

To ensure that you are choosing the correct straight feed to fit in with your system, please take a look at our Straights Table which details the analysis of various straights.

If you are looking for a spot price or a contract for the season, please email Iain Reid at iain@ecvg.co.uk and we will respond as soon as possible.
