

Availa4

Availa4® Performance Minerals

Availa4® is a patented combination of zinc, copper, manganese amino acid complexes, plus cobalt. It has been proven world wide to deliver consistent benefits in the following areas:

- Reproductive Performance
- Hoof Health Improvement
- Mastitis and SCC Reduction
- Milk Yield Improvement

Together they make one of the most delivering mineral packages in the dairy sector throughout Scotland.

Availa4® has been under commercial evaluation on, ECV Partner, John Forbes's dairy units since March 2005. Comprising of 600 dairy cows over three different units, the farms noticed an improvement in heat detection within 45-50 days with improved fertility throughout the herds.

With fertility, lameness and mastitis such topical issues at present, ECV are delighted to be offering this performance mineral in custom blends, dry powder minerals and buckets to farmers nationwide.

ECV customers using Availa4® have reported similar improvements re-enforcing Zinpros world wide trials of the product. Further information visit www.availa4.com or speak to one of ECV Nutritionists.
